

Undercounter Beer Cooler

Water Cooling System

Part # ASBCL 110

NEW DESIGN

The ASBCL-110 beer cooling system is designed for professional beverage cooling in restaurants bars and the catering industries .

This machine has pump with displacement of 8m thanks to which the cooler may be situated chilled all the way to the tap .

The ASBCL-110 has a continuous cooling capacity of 75 - 110ltr /h

The modern compressor cooling unit uses the power input for direct transfer to chilling which guarantees minimum energy uses

Krome Cooling technology is 45% more efficient than its power input

The Cooling Coils are made from Stainless Steel

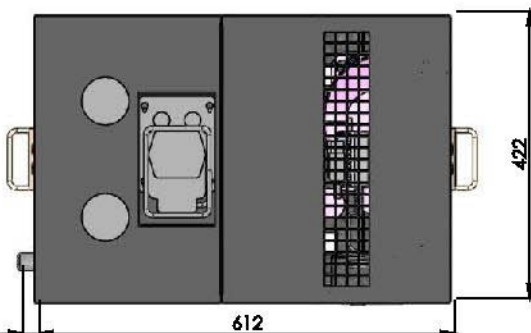

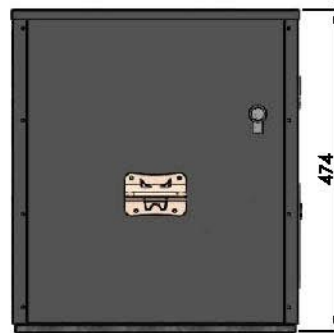

The Materials used meet the highest requirements for hygiene standards and guarantee a long working life of this cooler .

Two grab handles on the side of the machines enables the machine to be carried and moved with ease .

The cooler also includes an adjustable temperature control with 7 different settings

A coolers maintain a leading position among professional coolers on the market due to their modern technology and performance
